

```

6     container_name: nginx_preview
7     ports:
8       - "80:80"
9     volumes:
10      - ./nginx/conf.d.preview:/etc/nginx/conf.d:ro
11     depends_on:
12       - backend
13       - frontend
14     networks:
15       - app-network
16
17 backend:
18   build:
19     context: ./backend
20     dockerfile: Dockerfile.preview
21   container_name: backend_preview
22   environment:
23     - APP_ENV=preview
24     - APP_DEBUG=0
25   expose:
26     - "9000"
27   networks:
28     - app-network
29
30 frontend:
31   build:
32     context: ./frontend
33     dockerfile: Dockerfile.preview
34   container_name: frontend_preview
35   environment:
36     - NODE_ENV=production
37     - NEXT_PUBLIC_API_URL=${NEXT_PUBLIC_API_BASE_URL:-https://portail.techem.fr/api}
38   expose:
39     - "3000"
40   networks:
41     - app-network
42
43 networks:
44   app-network:
45     driver: bridge
46

```

```
13 COPY . .
14 RUN php bin/console cache:warmup --env=preview || true
15
16 FROM php:8.3-fpm
17 WORKDIR /var/www/backend
18 COPY --from=builder /var/www/backend /var/www/backend
19 ENV APP_ENV=preview APP_DEBUG=0
20 EXPOSE 9000
21 CMD ["php-fpm"]
22
```

3. frontend/Dockerfile.preview

Multi-stage pour Next.js SSR :

```
1 FROM node:20 AS builder
2 WORKDIR /usr/src/frontend
3 COPY package.json package-lock.json* ./
4 RUN npm ci
5 COPY . .
6 RUN npm run build
7
8 FROM node:20-alpine
9 WORKDIR /usr/src/frontend
10 COPY --from=builder /usr/src/frontend ./
11 ENV NODE_ENV=production
12 EXPOSE 3000
13 CMD ["npm", "run", "start"]
14
```

4. nginx/conf.d.preview/default.conf

Reverse proxy :

```
1 server {
2     listen 80;
3     server_name _;
4     client_max_body_size 50m;
5
6     # API -> backend (PHP-FPM)
7     location ~ \.php$ {
8         root /var/www/backend/public;
9         index index.php;
10        include fastcgi_params;
11        fastcgi_param SCRIPT_FILENAME $document_root$fastcgi_script_name;
12        fastcgi_pass backend:9000;
13    }
14
15    location /api/ {
16        root /var/www/backend/public;
17        index index.php;
18        try_files $uri /index.php$is_args$args;
19    }
20
21    # Frontend -> Next.js SSR

```

```
22     location / {
23         proxy_pass http://frontend:3000;
24         proxy_set_header Host $host;
25         proxy_set_header X-Real-IP $remote_addr;
26         proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
27         proxy_set_header X-Forwarded-Proto $scheme;
28         proxy_http_version 1.1;
29         proxy_set_header Upgrade $http_upgrade;
30         proxy_set_header Connection "upgrade";
31     }
32 }
33
```

5. Script docker-preview.starter.sh

Shell ▾

```
1  #!/usr/bin/env bash
2  set -euo pipefail
3
4  echo "=== TECHEM Portail Client - Preview bootstrap ==="
5  PROJECT_ROOT="$(cd "$(dirname "${BASH_SOURCE[0]}")" && pwd)"
6  cd "$PROJECT_ROOT"
7
8  # Copie des fichiers .env
9  cp backend/.env.preview.example backend/.env
10 cp frontend/.env.local.preview.example frontend/.env.local
11
12 echo "Construction des images preview..."
13 docker compose -f docker-compose.preview.yml build --no-cache
14
15 echo "Démarrage des services preview..."
16 docker compose -f docker-compose.preview.yml up -d
17
18 echo "Preview démarrée:"
19 echo "- Nginx: http://localhost"
20 echo "- Frontend SSR via Nginx"
21 echo "- Backend API via Nginx (/api)"
22
```

Commandes utiles

- Build & start preview :

Shell ▾

```
1  ./docker-preview.starter.sh
2
```

- Logs :

Shell ▾

```
1  docker compose -f docker-compose.preview.yml logs -f
2
```

- **Stop :**

Shell ▾

```
1 docker compose -f docker-compose.preview.yml down
2
```

Points clés

- Pas de volumes → images figées.
- Backend via PHP-FPM.
- Frontend SSR via Node.
- Nginx reverse proxy.
- Variables d'environnement spécifiques à preview.

Objectif : un environnement stable, proche de la prod, pour valider avant déploiement final.
